DETAILED ACTION

Response to Amendment

This Office Action has been issued in response to amendment filed 4 October 2007. Applicant's arguments have been carefully and fully considered and are persuasive.

Claim Status

Claims 44-58 remain pending and are ready for examination.

Allowable Subject Matter

Claims **44-58** are allowed.

The following is an Examiner's statement of reasons for allowance: the prior art made of record fails to teach the combination including the limitation of:

(Claim **44**) "...initiating the remote copy process to copy data from a first logical unit in the first storage cell to a copy of the first logical unit in the second storage cell over the storage network, wherein the remote copy process copies data using an initial native block size; and performing the spectrum sweep throughput probe during the remote copy process when the characteristic of the remote copy process satisfies at least one of the plurality of parameters.";

(Claim **49**) "...initiating the remote copy process to copy data from a first logical unit in the first storage cell to a copy of the first logical unit in the second storage cell over the storage network, wherein the remote copy process copies data using an initial native block size; and performing the spectrum sweep throughput probe during the

remote copy process when the characteristic of the remote copy process satisfies at least one of the plurality of parameters.”;

(Claim 54) “...initiating the remote copy process to copy data from a first logical unit in the first storage cell to a copy of the first logical unit in the second storage cell over the storage network, wherein the remote copy process copies data using an initial native block size; and performing the spectrum sweep throughput probe during the remote copy process when the characteristic of the remote copy process satisfies at least one of the plurality of parameters.”;

Support for such reasons of allowance and the limitations therein can be found in Applicant's specification starting at least in paragraph 0042. Further, the Examiner wishes to reference paragraph 0036 for explicit support and definition of the language "spectrum sweep throughput probe" which is found in the limitations noted *supra*.

As dependent claims **45-48**, **50-53**, and **55-58** depend from an allowable base claim; they are at least allowable for the same reasons as noted *supra*.

The prior art made of record, neither anticipates nor renders obvious the above-recited combinations for at least the reasons specified and as shown in Applicant's Arguments filed 4 October 2007.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
